

TOWN HALL SERIES:

PART 1

UNDERAGE TOBACCO USE

FEBRUARY 23, 2016

The Tobacco Free Living action team (TFL) of the Healthy St. Mary's Partnership is conducting a Town Hall Series on underage tobacco and E-cigarette use.

Tobacco use is the leading preventable cause of death and disease in the United States. Selling tobacco products to youth under the age of 18 is illegal, yet nearly 9 out of 10 smokers started smoking by the age of 18. Please join us to participate in a community conversation about:

- The harms and health effects of underage tobacco use
- Information on state and local regulations
- Myths vs. Facts
- Strategies to reduce tobacco use among youth
