

| Suggested Data Point | Does this data exist or is it developmental? | Reason to track? | Strategies to Address? |
|---|---|---|---|
| ED visits for mental health for children | Could get directly from the hospital | Sense of capacity/demand - info for crisis services needs; helps school system meet demands & needs of students | Crisis services |
| ED Visits for mental health for adults/geriatric (by age group) | Yes, HSCRC data. SMCSO does report (monthly) on transports by sheriff's office | looks at admitted, referred, or discharged | Crisis services |
| Admission rates | | | |
| Wait times for getting treatment | | | |
| Effects of COVID on future generations mental health | Developmental (physiological &/or psychological) | Major impact on community | addressing racial disparities |
| Availability of resources for adolescents and adults | | | Asset Mapping; availability of resources more so unknown for specialty groups |
| Increase access to Telehealth | Developmental (Potentially info from SMCHD RFP) | | Policy Advocacy; insurance coverage, access issues for clients/patients |
| Substance Use trends | ED Visits related to addictions related conditions (HSCRC), youth substance use trends (YRBS), adult alcohol consumption; Fatal overdoses | | |
| School Referrals to Treatment; Physician Referrals? | SMCPS tracks referrals to providers by social work team, but there are gaps | | |
| Adults & Geriatric who are referred to treatment | | | |
| Geriatric psych services availability | | | Gap analysis/asset mapping |
| Qualitative - coping mechanisms used across the age ranges, preventative care (look at it by age groups) | Developmental? | | Promote healthy coping mechanisms/preventive care/screenings; education on resources |
| Prescription Medication Costs & Medication Compliance | | | |
| Law Enforcement Data - EPs | look specifically at EPs, then mental subject code? | inform crisis services | change classification/coding of wellness checks to include info specifically mh related |
| Social Services Data | Developmental | inform health equity | |
| EPs who are admitted vs. released (continuity of care) | | | |
| Number of individuals who are scheduled for services (MH/SUD) with local providers but who never engage and why | Developmental | providers tracking # of no-shows | survey/questionnaire for care coordinators/case managers |
| Ratio of single interaction individuals and how many are repeated EPs | SMCSO does track this - broken down by adults & children - work into Law Enforcement data set | | |
| Health Equity Data? | Developmental; YRBS does break down data by sexual orientation | | education! LGBTQ community; language disparities |
