

REGROUNDING OUR RESPONSE

UNDERSTANDING ADVERSE CHILDHOOD EXPERIENCES

ABOUT THE PROGRAM

We welcome individuals interested in learning about public health concepts that are crucial to reducing stigma and responding to the opioid overdose crisis. We will cover the following topics:

BRAIN DEVELOPMENT

- How brains develop from birth to adulthood
- Impact of trauma on the developing brain

ADVERSE CHILDHOOD EXPERIENCES

- What are ACEs
- Understand the long-term effect that ACEs have on our health and overall well-being
- Recognize the connection between substance use and ACEs

RESILIENCE

- Identify key protective factors that help mitigate the impact of ACEs
- Understand how our response can be trauma-informed
- Understanding the role of harm reduction in addressing the opioid overdose crisis
