

Webinar

INTRODUCTION TO CANNABIS SCIENCE

JOIN US ON WEDNESDAY, SEPTEMBER 25

There is a lot of information available about the risks and medical benefits associated with cannabis use. Some information is confusing, while other information is intentionally misleading. It can be difficult for public health practitioners to identify and understand accurate cannabis science.

To help address this issue, **The Legal Resource Center for Public Health Policy-Cannabis** and the **University of Maryland School of Pharmacy** are hosting a webinar on September 25th to discuss the basics of cannabis science, as well as the health risks and medical benefits of cannabis use. Dr. Sera, a cannabis science expert and the Co-Director of the Medical Cannabis Science and Therapeutics program at the University of Maryland School of Pharmacy, will be presenting.

After participating in this webinar, participants should be able to:

- Describe the function of the endocannabinoid system
- Describe the effects of THC on the human body
- Summarize the state of evidence supporting the medical use of cannabis

Moderator: Mathew Swinburne, J.D., Director, LRC-Cannabis (he/him/his)

Speaker: Dr. Leah Sera, PharmD, MA, BCPS (she/her/hers)
Program Co-Director, Graduate Studies in Medical Cannabis
Associate Professor and Vice Chair of Academic Affairs
Department of Practice, Sciences, and Health Outcomes Research
University of Maryland School of Pharmacy
